

# Safety data sheet

Page: 1/14

---

BASF Safety data sheet according to the United Nations' Globally Harmonized System (UN GHS)

Date / Revised: 26.07.2024

Version: 4.0

Product: **Ammonium chloride RWS food grade**

(ID no. 30042426/SDS\_GEN\_00/EN)

Date of print 06.02.2025

---

## 1. Identification

### Product identifier

## Ammonium chloride RWS food grade

### Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses: food additive(s)

Recommended use: Raw material, auxiliary, inorganic salts, flavours

### Details of the supplier of the safety data sheet

Company:

BASF SE

67056 Ludwigshafen

GERMANY

Division Monomers

Telephone: +49 621 60 42737

E-mail address: pss.monomers@basf.com

### Emergency telephone number

International emergency number:

Telephone: +49 180 2273-112

---

## 2. Hazards Identification

### Classification of the substance or mixture

---

Safety data sheet according to the United Nations' Globally Harmonized System (UN GHS)

Date / Revised: 26.07.2024

Version: 4.0

Product: **Ammonium chloride RWS food grade**

(ID no. 30042426/SDS\_GEN\_00/EN)

Date of print 06.02.2025

---

According to UN GHS criteria

Acute Tox. 4 (oral)  
Eye Dam./Irrit. 2A  
Aquatic Acute 3

For the classifications not written out in full in this section the full text can be found in section 16.

**Label elements**Globally Harmonized System (GHS)

Pictogram:

Signal Word:  
Warning

Hazard Statement:

|      |                                |
|------|--------------------------------|
| H319 | Causes serious eye irritation. |
| H302 | Harmful if swallowed.          |
| H402 | Harmful to aquatic life.       |

Precautionary Statements (Prevention):

|      |   |
|------|---|
| P280 | Wear eye and face protection.   |
| P273 | Avoid release to the environment.   |
| P270 | Do not eat, drink or smoke when using this product.                             |
| P264 | Wash contaminated skin thoroughly with plenty of water and soap after handling. |

Precautionary Statements (Response):

|                    |  |
|--------------------|--|
| P301 + P312        | IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.   |
| P330               | Rinse mouth.   |
| P305 + P351 + P338 | IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. |
| P337 + P313        | If eye irritation persists: Get medical attention.   |

Precautionary Statements (Disposal):

|      |   |
|------|---|
| P501 | Dispose of contents and container to hazardous or special waste collection point. |
|------|---|

According to UN GHS criteria

Hazard determining component(s) for labelling: Ammonium chloride

**Other hazards**According to UN GHS criteria

If applicable information is provided in this section on other hazards which do not result in classification but which may contribute to the overall hazards of the substance or mixture.

No specific dangers known, if the regulations/notes for storage and handling are considered.

---

### 3. Composition/Information on Ingredients

#### Substances

Not applicable

#### Mixtures

##### Chemical nature

Ammonium chloride

Contains: formulation auxiliary, anticaking agent

##### Hazardous ingredients (GHS)

According to UN GHS criteria

Ammonium chloride

Content (W/W): > 99 %

CAS Number: 12125-02-9

EC-Number: 235-186-4

INDEX-Number: 017-014-00-8

Acute Tox. 4 (oral)

Eye Dam./Irrit. 2A

Aquatic Acute 3

H319, H302, H402

For the classifications not written out in full in this section the full text can be found in section 16.

---

### 4. First-Aid Measures

#### Description of first aid measures

Remove contaminated clothing.

If inhaled:

After inhalation of decomposition products: Keep patient calm, remove to fresh air, seek medical attention.

On skin contact:

Wash thoroughly with soap and water

On contact with eyes:

Immediately wash affected eyes for at least 15 minutes under running water with eyelids held open, consult an eye specialist.

On ingestion:

Immediately rinse mouth and then drink 200-300 ml of water, seek medical attention.

### **Most important symptoms and effects, both acute and delayed**

Symptoms: Information, i.e. additional information on symptoms and effects may be included in the GHS labeling phrases available in Section 2 and in the Toxicological assessments available in Section 11.

### **Indication of any immediate medical attention and special treatment needed**

Treatment: Treat according to symptoms (decontamination, vital functions), no known specific antidote.

---

## **5. Fire-Fighting Measures**

### **Extinguishing media**

Suitable extinguishing media:  
water spray

### **Special hazards arising from the substance or mixture**

Ammonia, anhydrous, hydrogen chloride

The substances/groups of substances mentioned can be released if the product is involved in a fire.

### **Advice for fire-fighters**

Special protective equipment:

Wear a self-contained breathing apparatus.

Further information:

Product itself is non-combustible; fire extinguishing method of surrounding areas must be considered. In case of fire and/or explosion do not breathe fumes. Large quantities of extinguishing water containing dissolved product should be contained. Contaminated extinguishing water must be disposed of in accordance with official regulations.

---

## **6. Accidental Release Measures**

### **Personal precautions, protective equipment and emergency procedures**

Use personal protective clothing.

### **Environmental precautions**

Do not empty into drains.

### **Methods and material for containment and cleaning up**

For residues: Pick up in dry form. Dispose of absorbed material in accordance with regulations.

---

## 7. Handling and Storage

### Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice.

Protection against fire and explosion:

No special precautions necessary.

### Conditions for safe storage, including any incompatibilities

Segregate from alkalis and alkalizing substances. Segregate from nitrites. Segregate from oxidants.  
Do not store with: Sodium nitrate

Suitable materials for containers: Polyester resin, glass reinforced (Palatal A410), High density polyethylene (HDPE), Low density polyethylene (LDPE), Stainless steel 1.4571, rubberized, enamelled, Paper/Fibreboard

Further information on storage conditions: Protect against moisture.

## 8. Exposure Controls/Personal Protection

### Control parameters

#### Components with occupational exposure limits

7647-01-0: hydrogen chloride

7664-41-7: Ammonia, anhydrous

12125-02-9: Ammonium chloride

### Exposure controls

#### Personal protective equipment

Respiratory protection:

Breathing protection if dusts are formed. Particle filter with low efficiency for solid particles (e.g. EN 143 or 149, Type P1 or FFP1)

Hand protection:

Chemical resistant protective gloves (EN ISO 374-1)

Suitable materials also with prolonged, direct contact (Recommended: Protective index 6, corresponding > 480 minutes of permeation time according to EN ISO 374-1):

chloroprene rubber (CR) - 0.5 mm coating thickness

butyl rubber (butyl) - 0.7 mm coating thickness

nitrile rubber (NBR) - 0.4 mm coating thickness

fluoroelastomer (FKM) - 0.7 mm coating thickness

polyvinylchloride (PVC) - 0.7 mm coating thickness

Supplementary note: The specifications are based on tests, literature data and information of glove manufacturers or are derived from similar substances by analogy. Due to many conditions (e.g. temperature) it must be considered, that the practical usage of a chemical-protective glove in practice may be much shorter than the permeation time determined through testing.

Manufacturer's directions for use should be observed because of great diversity of types.

Eye protection:

Safety glasses with side-shields (frame goggles) (e.g. EN 166)

**Body protection:**

Body protection must be chosen depending on activity and possible exposure, e.g. apron, protecting boots, chemical-protection suit (according to EN 14605 in case of splashes or EN ISO 13982 in case of dust).

**General safety and hygiene measures**

Handle in accordance with good industrial hygiene and safety practice. Avoid inhalation of dusts. When using, do not eat, drink or smoke. Remove contaminated clothing immediately and clean before re-use or dispose it if necessary.

---

## 9. Physical and Chemical Properties

### 9.1. Information on basic physical and chemical properties

|                            |  |  |
|----------------------------|--|--|
| State of matter:           | solid  |  |
| Form:                      | crystalline, powder  |  |
| Colour:                    | white  |  |
| Odour:                     | almost odourless   |  |
| Odour threshold:           | not applicable, odour not perceivable  |  |
| Melting point:             | 338 °C<br>Literature data.<br>The substance / product decomposes.              |  |
| Boiling point:             | (1.013,25 hPa)<br>The substance / product decomposes therefore not determined. |  |
| Sublimation point:         | 338 °C<br>The substance / product decomposes.                                  |  |
| Flammability:              | not flammable  | (Regulation 440/2008/EC, A.10)                 |
| Lower explosion limit:     | For solids not relevant for classification and labelling.                      |  |
| Upper explosion limit:     | For solids not relevant for classification and labelling.                      |  |
| Flash point:               | not applicable   |  |
| Auto-ignition temperature: | The substance / product decomposes therefore not determined.                   |  |
| Self-ignition temperature: |  | Test type: Self-ignition at high temperatures. |
| Thermal decomposition:     | not self-igniting<br>To avoid thermal decomposition, do not overheat.          |  |
| SADT:                      | Not a substance/mixture liable to self-decomposition according to GHS.         |  |

Safety data sheet according to the United Nations' Globally Harmonized System (UN GHS)

Date / Revised: 26.07.2024

Version: 4.0

Product: **Ammonium chloride RWS food grade**

(ID no. 30042426/SDS\_GEN\_00/EN)

Date of print 06.02.2025

|   |   |  |
|---|---|--|
| pH value:   | 5,0 - 5,5<br>(1,0 - 10,0 %(m), 25 °C)                                 |  |
| Viscosity, dynamic:                                 | not applicable, the product is a solid                                |  |
| Solubility in water:                                | 296 - 298 g/l<br>(20 °C, pH 5,4)                                      | (OECD Guideline 105)                     |
| Partitioning coefficient n-octanol/water (log Kow): | The value has not been determined because the substance is inorganic. |  |
| Vapour pressure:                                    | 66 mbar<br>(250 °C)   |  |
| Density:  | Literature data.<br>1,5274 g/cm <sup>3</sup><br>(20 °C)               |  |
| Particle characteristics                            |   |  |
| Particle size distribution:                         | 100 - 125 µm  | (D50, Volumetric Distribution, measured) |

## 9.2. Other information

### Information with regard to physical hazard classes

#### Explosives

Explosion hazard: not explosive (Regulation 440/2008/EC, A.14)

Impact sensitivity:

Based on the chemical structure there is no shock-sensitivity.

#### Oxidizing properties

Fire promoting properties: not fire-propagating (Regulation 440/2008/EC, A.17)

#### Pyrophoric properties

Self-ignition temperature: Test type: Spontaneous self-ignition at room-temperature.

not self-igniting

#### Self-heating substances and mixtures

Self heating ability: It is not a substance capable of spontaneous heating.

### Other safety characteristics

Bulk density: 600 - 900 kg/m<sup>3</sup> (DIN ISO 697)

pKA: not applicable

*Information on: Ammonia, anhydrous*

pKA: *Study scientifically not justified., The substance does not dissociate.*

-----  
Hygroscopy: hygroscopic

:

Study scientifically not justified.

Surface tension:

Based on chemical structure, surface activity is not to be expected.

---

Safety data sheet according to the United Nations' Globally Harmonized System (UN GHS)

Date / Revised: 26.07.2024

Version: 4.0

Product: **Ammonium chloride RWS food grade**

(ID no. 30042426/SDS\_GEN\_00/EN)

Date of print 06.02.2025

---

Evaporation rate:

The product is a non-volatile solid.

---

## 10. Stability and Reactivity

### Reactivity

No hazardous reactions if stored and handled as prescribed/indicated.

### Chemical stability

The product is chemically stable.

### Possibility of hazardous reactions

Violent reaction under influence of oxidizing agents. Incompatible with bases. Reacts with nitrites. The product is stable if stored and handled as prescribed/indicated.

### Conditions to avoid

Avoid heat. Avoid moisture. See SDS section 7 - Handling and storage.

### Incompatible materials

Substances to avoid:  
nitrites, nitrates, oxidizing agents

### Hazardous decomposition products

Hazardous decomposition products:  
hydrogen chloride, Ammonia, anhydrous

---

## 11. Toxicological Information

### Information on toxicological effects

#### Acute toxicity

Assessment of acute toxicity:

Of moderate toxicity after single ingestion. Virtually nontoxic after a single skin contact.

Experimental/calculated data:

LD50 rat (oral): 1.410 mg/kg (BASF-Test)

(by inhalation): No data available.

LD50 rat (dermal): > 2.000 mg/kg (Directive 92/69/EEC, B.3)

No mortality was observed.

#### Irritation

**Assessment of irritating effects:**

Not irritating to the skin. Eye contact causes irritation.

**Experimental/calculated data:**

Skin corrosion/irritation rabbit: non-irritant (Draize test)

Serious eye damage/irritation rabbit: Irritant. (BASF-Test)

**Respiratory/Skin sensitization****Assessment of sensitization:**

Skin sensitizing effects were not observed in animal studies.

**Experimental/calculated data:**

Guinea pig maximization test guinea pig: Non-sensitizing. (similar to OECD guideline 406)

**Germ cell mutagenicity****Assessment of mutagenicity:**

In the majority of studies performed with microorganisms and in mammalian cell culture, a mutagenic effect was not found. A mutagenic effect was also not observed in in vivo tests.

**Carcinogenicity****Assessment of carcinogenicity:**

In long-term studies in rats in which the substance was given by feed, a carcinogenic effect was not observed.

**Reproductive toxicity****Assessment of reproduction toxicity:**

Study scientifically not justified.

**Developmental toxicity****Assessment of teratogenicity:**

No indications of a developmental toxic / teratogenic effect were seen in animal studies.

**Specific target organ toxicity (single exposure)****Assessment of STOT single:**

Apart from effects causing lethality, no specific target organ toxicity was observed in experimental studies.

**Repeated dose toxicity and Specific target organ toxicity (repeated exposure)****Assessment of repeated dose toxicity:**

Repeated oral uptake of the substance did not cause substance-related effects.

**Aspiration hazard**

not applicable

---

## 12. Ecological Information

### Toxicity

Assessment of aquatic toxicity:

Harmful to aquatic life.

Acutely harmful for aquatic organisms. The inhibition of the degradation activity of activated sludge is not anticipated when introduced to biological treatment plants in appropriate low concentrations.

Toxicity to fish:

LC50 (96 h) 42,91 mg/l Ammonium chloride, *Oncorhynchus mykiss* (other, other)

Aquatic invertebrates:

EC50 (48 h) 136,6 mg/l, *Daphnia magna* (other, static)

Aquatic plants:

EC50 (5 d) 1.300 mg/l (growth rate), *Chlorella vulgaris* (other, static)

The product has not been tested. The statement has been derived from substances/products of a similar structure or composition.

EC50 (18 d) 2.700 mg/l (biomass), *Chlorella vulgaris* (other, static)

The product has not been tested. The statement has been derived from substances/products of a similar structure or composition.

Microorganisms/Effect on activated sludge:

EC20 (0,5 h) approx. 850 mg/l, activated sludge, domestic (OECD Guideline 209, aquatic)

Chronic toxicity to fish:

EC10 (30 d) 4,28 mg/l ammonium chloride, *Lepomis macrochirus* (other, Flow through.)

Chronic toxicity to aquatic invertebrates:

EC10 (70 d) 2,52 mg/l ammonium chloride, aquatic crustacea (other, semistatic)

Assessment of terrestrial toxicity:

Toxic effects have been observed in studies with soil living organisms.

Soil living organisms:

LC50 (14 d) 163 mg/kg, *Eisenia foetida* (other, artificial soil)

Terrestrial plants:

No observed effect concentration (84 d) 626 mg/l

The product has not been tested. The statement has been derived from substances/products of a similar structure or composition.

Other terrestrial non-mammals:

Study scientifically not justified.

### Persistence and degradability

Assessment biodegradation and elimination (H<sub>2</sub>O):

Inorganic product which cannot be eliminated from water by biological purification processes. Can be oxidized to nitrate, or be reduced to nitrogen, by microorganisms.

Elimination information:  
not applicable

Assessment of stability in water:  
According to structural properties, hydrolysis is not expected/probable.  
Study scientifically not justified.  
Information on Stability in Water (Hydrolysis):  
Study scientifically not justified.

### **Bioaccumulative potential**

Assessment bioaccumulation potential:  
Accumulation in organisms is not to be expected.

Bioaccumulation potential:  
Accumulation in organisms is not to be expected.

### **Mobility in soil**

Assessment transport between environmental compartments:  
Volatility: The substance will not evaporate into the atmosphere from the water surface. Study scientifically not justified.  
Adsorption in soil: Adsorption to solid soil phase is possible.

### **Other adverse effects**

The substance is not listed in Regulation (EC) 1005/2009 on substances that deplete the ozone layer.

### **Additional information**

Add. remarks environm. fate & pathway:  
The product has not been tested. The statements on environmental fate and pathway have been derived from the properties of the individual components.

---

## **13. Disposal Considerations**

### **Waste treatment methods**

Contact manufacturer regarding recycling.  
Contact waste centre regarding recycling.

Contaminated packaging:  
Contaminated packaging should be emptied as far as possible; then it can be passed on for recycling after being thoroughly cleaned.

## 14. Transport Information

### Land transport

#### ADR

|                               |  |
|-------------------------------|--|
