SAFETY DATA SHEET

White Oil 70 NF

Section 1. Identification

| GHS product identifier | : White Oil 70 NF | |
|----------------------------------|--------------------------------------------------------------------------|--|
| Other means of identification | : Not available. | |
| Product type | : Liquid. | |
| Supplier's details | Level 7 Chemical 253 Sturgis Rd Conway, Ar 72032 1-855-927-1777 | |
| Emergency telephone number | : CHEMTREC (800) 424-9300 (AVAILABLE 24 HOURS A DAY) | |

Section 2. Hazards identification

| OSHA/HCS status | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). | |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|--|
| Classification of the | : ASPIRATION HAZARD - Category 1 | |
| substance or mixture | | |
| GHS label elements | | |
| Hazard pictograms | | |
| | | |
| Signal word | : Danger | |
| Hazard statements | : May be fatal if swallowed and enters airways. | |
| Precautionary statements | | |
| General | : Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand. | |
| Prevention | Not applicable. | |
| Response | : IF SWALLOWED: Immediately call a POISON CENTER or physician. Do NOT induce vomiting. | |
| Storage | : Store locked up. | |
| Disposal | Dispose of contents and container in accordance with all local, regional, national and international regulations. | |
| Hazards not otherwise classified | : None known. | |

Section 3. Composition/information on ingredients

| Substance/mixture | : Substance |
|-------------------|------------------|
| Other means of | : Not available. |
| identification | |

| CAS number/other ide | ntifiers | | |
|----------------------|-------------|-----|------------|
| CAS number | : 8042-47-5 | | |
| Product code | : 1800005 | | |
| Ingredient name | | % | CAS number |
| White Mineral Oil | | 100 | 8042-47-5 |

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

| Eye contact | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs. |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Inhalation | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Skin contact | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse. |
| Ingestion | : Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Aspiration hazard if swallowed. Can enter lungs and cause damage. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

Most important symptoms/effects, acute and delayed

| Potential acute health effe | | |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Eye contact | No known significant effects or critical hazards. | |
| Inhalation | No known significant effects or critical hazards. | |
| Skin contact | No known significant effects or critical hazards. | |
| Ingestion | May be fatal if swallowed and enters airways. | |
| Over-exposure signs/symp | <u>i</u> | |
| Eye contact | No specific data. | |
| Inhalation | No specific data. | |
| Skin contact | No specific data. | |
| Ingestion | Adverse symptoms may include the following: nausea or vomiting | |
| Indication of immediate me | attention and special treatment needed, if necessary | |
| Notes to physician | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. | |
| Specific treatments | No specific treatment. | |
| Protection of first-aiders | No action shall be taken involving any personal risk or without suitable training. be dangerous to the person providing aid to give mouth-to-mouth resuscitation. | |

See toxicological information (Section 11)

Section 5. Fire-fighting measures

| <u>Extinguishing media</u> | |
|--------------------------------------------|---------------------------------------------------------------------------------------|
| Suitable extinguishing media | : Use an extinguishing agent suitable for the surrounding fire. |
| Unsuitable extinguishing media | : None known. |
| Specific hazards arising from the chemical | : In a fire or if heated, a pressure increase will occur and the container may burst. |
| Hazardous thermal decomposition products | : No specific data. |

Section 5. Fire-fighting measures

| Special protective actions for fire-fighters | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable | |
|------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| | training. | |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. | |
| Remark | : No additional remark. | |
| Remark | : No additional remark. | |

Section 6. Accidental release measures

| Personal precautions, protec | tive equipment and emergency procedures | |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| For non-emergency personnel | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. | |
| For emergency responders | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". | |
| Environmental precautions | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). | |
| Methods and materials for co | ntainment and cleaning up | |
| Small spill | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. | |
| Large spill | : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. | |

Section 7. Handling and storage

| Precautions for safe handling | |
|--------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Protective measures | : Put on appropriate personal protective equipment (see Section 8). Do not swallow. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |
| Conditions for safe storage, including any incompatibilities | : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. |

Section 8. Exposure controls/personal protection

| - | | |
|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Control parameters | | |
| Occupational exposure li | <u>mits</u> | |
| White Mineral Oil | ACGIH TLV (United States). | |
| | | |
| | OSHA PEL (United States). TWA: 5 mg/m³ | |
| | TWA. 3 mg/m | |
| Appropriate engineering controls | : Good general ventilation should be sufficient to control worker exposure to airborne contaminants. | |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. | |
| Individual protection meas | <u>ures</u> | |
| Hygiene measures | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. | |
| Eye/face protection | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields. | |
| Skin protection | | |
| Hand protection | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. | |
| Body protection | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. | |
| Other skin protection | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. | |
| Respiratory protection | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe | |

Section 9. Physical and chemical properties

working limits of the selected respirator.

| Appearance | | |
|----------------------------------------------|---|-----------------------------------------|
| Physical state | : | Liquid. |
| Color | 1 | Colorless. Clear |
| Odor | : | Mild Heavy Hydrocarbon. |
| Odor threshold | : | Not available. |
| рН | : | Not available. |
| Melting point | : | -9°C (15.8°F) |
| Boiling point | : | 218°C (424.4°F) |
| Flash point | 1 | Open cup: 184°C (363.2°F) (Cleveland.). |
| Burning time | 1 | Not applicable. |
| Burning rate | : | Not applicable. |
| Evaporation rate | : | Not available. |
| Flammability (solid, gas) | 1 | Not available. |
| Lower and upper explosive (flammable) limits | : | Lower: 1% Upper: 7% |

Section 9. Physical and chemical properties

| Vapor pressure | 1 | 0.01 kPa (0.08 mm Hg) (at 20°C) |
|--------------------------------------------|---|---------------------------------|
| Vapor density | 1 | Not available. |
| Relative density | 1 | 0.845 (Water = 1) |
| Solubility | : | Not available. |
| Solubility in water | 1 | Not available. |
| Partition coefficient: n- octanol/water | : | Not available. |
| Auto-ignition temperature | 1 | 345°C (653°F) |
| Decomposition temperature | 1 | Not available. |
| SADT | 1 | Not available. |
| Viscosity | 1 | Not available. |

Section 10. Stability and reactivity

| Reactivity | : No specific test data related to reactivity available for this product or its ingredients. |
|------------------------------------|--------------------------------------------------------------------------------------------------------|
| Chemical stability | : The product is stable. |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur. |
| Conditions to avoid | : No specific data. |
| Incompatible materials | : No specific data. |
| Hazardous decomposition products | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

| Result | Species | Dose | Exposure |
|------------------------------------------------------|------------------------|-----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| LD50 Dermal LD50 Oral LD50 Dermal LD50 Oral | Rat Rabbit | >5000 mg/kg >2000 mg/kg | |
| | D50 Dermal D50 Oral | D50 Dermal Rat D50 Oral Rat D50 Dermal Rabbit | D50 Dermal Rat >2000 mg/kg D50 Oral Rat >5000 mg/kg D50 Dermal Rabbit >2000 mg/kg |

Conclusion/Summary

: No additional remark.

Irritation/Corrosion

Not available.

Sensitization

Not available.

Mutagenicity

Not available.

Carcinogenicity

Not available.

Conclusion/Summary : No additional remark.

Reproductive toxicity

Not available.

Teratogenicity

Not available.

<u>Specific target organ toxicity (single exposure)</u> Not available.

Specific target organ toxicity (repeated exposure)

Section 11. Toxicological information

Not available.

Aspiration hazard

Not available.

| Information on the likely routes of exposure | : | Not available. |
|-------------------------------------------------|------------|---------------------------------------------------|
| Potential acute health effects | | |
| Eye contact | 1 | No known significant effects or critical hazards. |
| Inhalation | : | No known significant effects or critical hazards. |
| Skin contact | 1 | No known significant effects or critical hazards. |
| Ingestion | 1 | May be fatal if swallowed and enters airways. |
| Symptoms related to the physical | <u>sic</u> | al, chemical and toxicological characteristics |
| Eye contact | 4 | No specific data. |
| Inhalation | 4 | No specific data. |
| Skin contact | 4 | No specific data. |

| Ingestion | 1 | Adverse symptoms may include the following: |
|-----------|---|---------------------------------------------|
| | | nausea or vomiting |

Delayed and immediate effects and also chronic effects from short and long term exposure

| <u>Short term exposure</u> | |
|--------------------------------|-----------------------------------------------------|
| Potential immediate effects | : Not available. |
| Potential delayed effects | : Not available. |
| Long term exposure | |
| Potential immediate effects | : Not available. |
| Potential delayed effects | : Not available. |
| Potential chronic health effe | <u>cts</u> |
| Not available. | |
| General | : No known significant effects or critical hazards. |
| Carcinogenicity | : No known significant effects or critical hazards. |
| Mutagenicity | : No known significant effects or critical hazards. |
| Teratogenicity | : No known significant effects or critical hazards. |
| Developmental effects | : No known significant effects or critical hazards. |
| Fertility effects | : No known significant effects or critical hazards. |

Numerical measures of toxicity

Acute toxicity estimates

Not available.

Section 12. Ecological information

Toxicity

Not available.

Persistence and degradability

Conclusion/Summary

: No additional remark.

Bioaccumulative potential Not available.

Section 12. Ecological information

| <u>Mobility in soil</u> | |
|----------------------------------------|------------------|
| Soil/water partition coefficient (Koc) | : Not available. |

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

| Disposal methods | The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Section 14. Transport information

| | UN number | UN proper shipping name | Transport hazard class(es) | Packing group | | Additional information |
|-----------------------|----------------|----------------------------|-------------------------------|---------------|-----|------------------------|
| DOT Classification | Not regulated. | - | - | _ | No. | Not applicable. |

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Section 15. Regulatory information

| • | • |
|---------------------------------------------------------------------|----------------------------------------------------------|
| U.S. Federal regulations | : TSCA 8(a) CDR Exempt/Partial exemption: Not determined |
| | United States inventory (TSCA 8b): Not determined. |
| Clean Air Act Section 112 (b) Hazardous Air Pollutants (HAPs) | : Not listed |
| Clean Air Act Section 602 Class I Substances | : Not listed |
| Clean Air Act Section 602 Class II Substances | : Not listed |
| DEA List I Chemicals (Precursor Chemicals) | : Not listed |
| DEA List II Chemicals (Essential Chemicals) | : Not listed |

| Chemical Weapons Convention List Schedule II Chemicals | : | Not listed |
| Chemical Weapons Convention List Schedule III Chemicals | : | Not listed |

Section 16. Other information

Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks Although HMIS® ratings are not required on SDSs under 29 CFR 1910. 1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.

The customer is responsible for determining the PPE code for this material.
